Changelog RayPack 7.1

7.1.6518.3431 (Service Pack 1)

Released on 16 Feb 2022

Improvements

- When creating a new PSADT wrapper, the icon is now automatically extracted from the selected installer. `RPK-4273`
- PSADT Action "*Check if item exists*" now supports intellisense for variables. `RPK-4331`
- Package code field in *PackDesigner* has now extra validation for supported characters. `RPK-4336`
- *PackWrapper* (PSADT editor) now supports in-app help by pressing F1 button. `RPK-4337`
- Mandatory PSADT action parameters are now clearly marked. `RPK-4364`
- Ability to add missing sections (for example "*Repair*") if the original script does not contain them. `RPK-4368`
- Recent PSADT projects now display the actual project names instead of generic file names. `RPK-4374`
- PSADT action "*Install MSI*" has now a browse button for MST files. `RPK-4378`
- Paths selected from various open file dialogs in PSADT editor now are by default written using variables and - whenever possible - relative paths. `RPK-4380`
- Fix-up names in MSIX editor are now human-friendly. `RPK-4384`
- Updated set of merge modules. `RPK-4388`
- In MSI/RPP projects, empty components are now removed when the last resource is deleted. `RPK-4390`
- Updated list of MSIX dependencies. `RPK-4397`

Resolved issues

- Fixed an issue, when cancelling repackaging and navigating back to the hive and exclusion selector in PackRecorder would not render the list of drives and registry keys. `RPK-4290`
- Fixed an issue, when non-English translations for RayPack Express edition were not used in the activation dialog. `RPK-4295`
- Fixed an issue, where it was possible to use restricted file and folders names in *PackWrapper.* `RPK-4297`
- Fixed an issue, where *PackTailor* would return an error, when connecting to a virtual machine. `RPK-4310`
- Fixed an issue, where tooltips for cell validation would contain a clipped text. `RPK-4322`
- Fixed minor visual glitches in *PackWrapper* action "*Check if item exists*". `RPK-4330`
- Fixed an issue, where supporting CAB files were not saved to *RayFlow*. `RPK-4333`
- Fixed detection of App-V sequencer by *PackBot*. `RPK-4338` `RPK-4347`
- Fixed an issue, where Visual Basic script PSADT action was not properly refreshed after making changes in the Advanced View. `RPK-4340`
- Fixed wrong value of parameter `Description` in PSADT action "*Set active setup*". `RPK-4341`
- Fixed an issue, where adding a PSADT action "*Install MSIX*" could freeze the Advanced View. `RPK-4342`
- Fixed various issues in German and Polish translation. `RPK-4343` `RPK-4352` `RPK-4375`
- Fixed wrong selection of non-default profile when using PackBot. `RPK-4344`
- Fixed an issue, where a wrong registry key was focused after adding a new key in PackDesigner. `RPK-4345`
- Added missing vertical scrollbars in PackBot settings. `RPK-4348`
- Improved handling of user profile when running MSIX and MSI-based RayPack instance on the same machine. `RPK-4349` `RPK-4353` `RPK-4361`
- Fixed wrong parameter selection for PSADT action "*Install MSI*". `RPK-4354`
- Fixed a rare issue, where *RayPack* could not be started, when installed from Microsoft Store. `RPK-4357`
- Fixed loading of PSADT projects, that did not contain the "*Repair*" section. `RPK-4368`
- Fixed an issue, where wrapped `Ray-` functions were shown on the list, even if using a standard PSADT template. `RPK-4366`
- Fixed an issue where it was possible to set contradictory options for PSADT Active Setup action. `RPK-4376`
- Added drop-downs with variables in many text editor for PSADT actions. `RPK-4379`
- Added missing extension names in open file dialogs. `RPK-4366` `RPK-4381`

- Fixed a `NullReferenceException` when adding items to an MSI project in case of an invalid profile. **RPK-4382**
- Fixed PSADT action `Get-InstalledApplication`. **RPK-4383**
- Fixed an issue with invalid references to a directory, when `TypeLib` table needed to be created. **RPK-4386**
- Fixed manifest validation error in case of blank characters in MSIX product name. **RPK-4389**
- Fixed an issue, where the content of PSADT Advanced View could be not synchronized with the current project. **RPK-4393**
- Fixed capturing of unnecessary resources by *PackBot*. **RPK-4394**
- Added missing text field to select the target variable for PSADT action "*Get Registry value*". **RPK-4395**
- Fixed a `NullReferenceException` when saving an MSIX project. **RPK-4396**
- Fixed generation of PSADT action parameters containing spaces. **RPK-4398**
- Fixed block buttons in PSADT editor. **RPK-4400**
- Fixed a warning when MSIX description text field was empty. **RPK-4402**
- Fixed an issue, where removing a registry key would return an error when PSADT option "*Only if empty*" was used. **RPK-4405**
- Fixed an issue, where it was not possible to call external scripts with whitespaces in path from PSADT project. **RPK-4406**
- Fixed PSADT action `SetActiveSetup`. **RPK-4407**
- Fixed an error shown when removing a non-empty `else` statement. **RPK-4409**
- Fixed wrong data in `AdminInstallationSequence` in "New Custom Action" wizard. **RPK-4412**
- Fixed app freezes when adding multiple "*Set Registry key*" PSADT actions. **RPK-4413**
