✅ RayEval 7.3

7.3.2309.2383 [Update 1]

Released on Aug 24, 2023

New features

- PackBench now uses Windows Credentials Store for RayFlow connectivity, and is able to reuse login session from other RayPack Studio products. `RF-4879` `RF-4883` `RF-4607` `ZEN-17962` `ZEN-19506` `ZEN-20902`

Improvements

- It is now possible to use floating license with MSIX-based deployment of RayEval. `RPK-4693`

Fixes

- Fixed various issues with localized texts. `RPK-4786` `RVL-700`
- Fixed an issue, where where an inaccurate error message was displayed when a template was lacking a column in a steps table. `RVL-615`
- Fixed an issue where `ApplicationData` failed to update as expected. `RVL-702`
- Fixed an error that occurred during the export of a project as a PDF file. `RVL-704` `ZEN-21258`
- Fixed an issue with cloning of the default configuration. `RVL-705` `ZEN-21525`
- Fixed an issue, where Windows 11 could be recognized as Windows 10. `RVL-713`
- Fixed an issue, where system snapshots could not be created due to a missing file. `RVL-716`

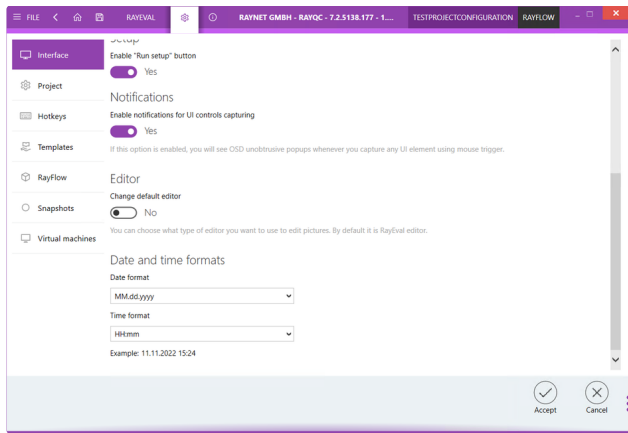

7.3.2292.2380 [RTM]

Released on Dec 2, 2022

Spell-Checking for Step Descriptions `RVL-128`

When editing the description of a step, the text is automatically checked against spell-checks and offers auto-suggestions (availability of the support of a language depends on the Windows settings). This way it is easy to eliminate spelling errors and grammar mistakes without additional proof-reading.
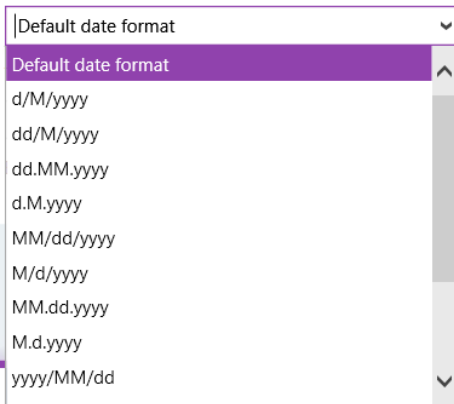

## Configurable Regional Settings for Date Formats RVL-378

Date format is now configurable in the program settings. RayEval now offers multiple different ways the dates are presented.

Other Improvements

- Improved scrolling when dragging steps. RVL-584
- Improved the handling of the clipboard. RVL-362

Resolved Issues

- Improved the German localization. RVL-131
