# Introduction

RayFlow is a workflow process management tool with the ability to support diverse workflow processes. The possibility to be customized at the level of user's needs and requirements makes it one of the most efficient and user friendly workflow management tools.

RayFlow is based on the client-server architecture in which all the information, data and configuration is stored on the RayFlow server. Users work on this server remotely via the RayFlow web and Windows based desktop client interfaces.

With this Service Pack release of the RayFlow desktop client, Raynet provides fixes to issues reported by users. Thanks a lot for your participation in our ambition to provide tools that perfectly lighten our users everyday tasks.

---

# Resolved Issues

The following issues have been fixed as part of this Service Pack release of the RayFlow desktop client:

- Page format of SSRS reports changed to A4 landscape [RF-724]
- File upload to virtual directories not working if UploadTemp is a virtual directory [RF-457]
- New user can't load project [RF-793]
- SSRS reports: Some columns show "not assigned" even when mapped to a data field [RF-802]
- The first data field is always used as package name [RF-236]
- Uploading a file/writing a comment with unsaved changes in the package properties tab would cause a crash [RF-851]

# System Requirements

## Software requirements

Raynet is looking forward to receiving feedback from your RayFlow experience. Please contact your Raynet service partner or write an e-mail to [support@raynet.de](mailto:support@raynet.de) to add your ideas or requirements to the RayFlow development roadmap.

## About Raynet

Raynet GmbH is a leading and innovative service and solution provider in information technology and specialized in the architecture, implementation and operation of all tasks within "Application Lifecycle Management". Raynet's Headquarters is in Germany and presently has more locations in Germany, USA, Poland, UK and Belgium.

For over 15 years, Raynet has supported hundreds of customers and partners with its products and solutions for enterprise application management projects worldwide. These include license management, software packaging, software deployment, migrations, client engineering and much more. Additionally, Raynet maintains and cultivates strong partnerships with leading companies in Application Lifecycle Management.

Raynet products and solutions are unique in design and functionality. Their development is highly driven by our customers and partners who play a big role in the development of our products and are a key reason why our products are always cutting edge. Whether you want to introduce a new deployment tool or to start a SAM project, whether you want to plan a packaging factory or do a migration – Raynet is the choice for best-of-breed-practices in services, products, and solutions for Application Lifecycle Management.
