RayFlow Upgrade Additional Information	10

Introduction

This release of RayFlow 4.0 provides both, functional improvements, as well as fixes for known issues from prior versions. RayFlow is available as a stand-alone product as well as can serve as the backbone for RaySuite Enterprise Solution.

Enterprise Application Lifecycle Management

Visit www.raynet.de for further information regarding the product and current community incentives.

Raynet is looking forward to receiving your feedback from your RayFlow experience. Please contact your Raynet service partner or write an e-mail to sales@raynet.de to add your ideas or requirements to the RayFlow development road map!

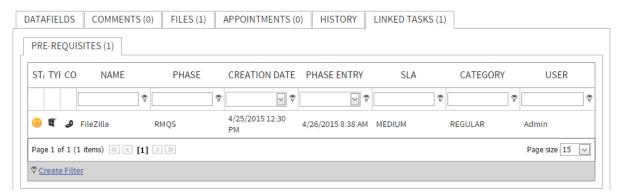

New Features & Improvements

Use of Custom Field within Custom Filter

Custom Filter functionality in RayFlow, allows a user to define custom filter criteria's for filtering tasks and then executing the desired operation on them e.g. Batch Processing. With the release of this version, a user will have an ability to use custom fields in RayFlow defining the filter criteria.

Linked Task

The Linked Task feature in RayFlow allows users to link tasks within a project. The linked tasks can be arranged in user defined groups i.e. while linking a task or tasks, a user need to specify the group to which those tasks will belong to. This is meant to enable users to define different categories of task which are linked to a specific task.

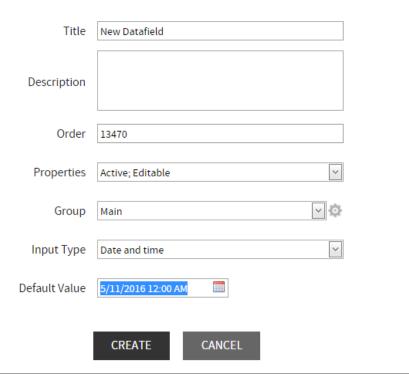

Date Time and Date as Data Field

A user has now ability to create data fields of type Date and Date with time. Additionally, a user can use the rich date and time selector to set a default value for the data field.

Create New Datafield

Menu Selector Component

Previously, for adding a new menu item to a new permission group, a user was required to manually enter the link of the desired item. Now all the available menu items are available to users in form of a drop-down menu. This improvement is meant to reduce the effort required by RayFlow Administrators, while defining a new permission group.

Task Lock

The Task Lock feature simply prohibits another user from editing a task. The respective task will be visible to users, who have at least view permission to the phase in which the task is located, however they will not be able to edit it.

As shown in the image below, a task which is locked by a user shows following message, as part of the task property.

User Defined Configuration Localization

Ability to localize RayFlow web interface was introduced in RayFlow version 2.1. However this feature did not offer a possibility to localize user defined configurations. With release of this version, a user will now be able to localize custom configuration properties. Each of such properties e.g. phase name, description, data field name etc. will have a localization icon shown next to it.

Selecting this icon will open a localization dialog, where a user can define the translation for configuration name property, for supported languages.

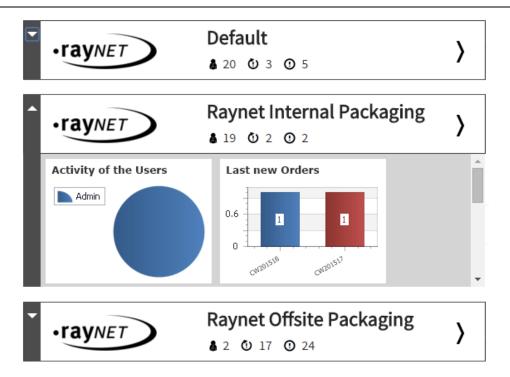

Grouping of Data Fields

Within the phase configuration view, the data fields belonging to that respective project are grouped based upon their assigned group. Additionally, with group configuration option, a user can define editing and mandatory property for all the data fields within it.

Project Overview

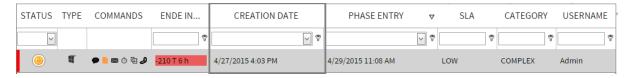

A user can now view quick reports related to the projects to which he is assigned directly from the project selection page. Additionally, each of the quick report can simply be clicked upon and it will take the user directly to the Quick Reports page.

Task Creation Date

A user will now be able to view the task creation date along with phase entry date and time, as default column header of the task list within a phase.

Developer Notes

Changes to the RayFlow Web Service

RayFlow Web Service has been changed to support the new features which has been introduced in this release. Following is an overview of the major changes implemented:

New methods:

Task linking

- o RayflowUpdateResult wsJoinTopic(Guid topicId, RayFlowTopicMemberType type, Guid memberId, out string errorMessage);
- o RayflowUpdateResult wsLeaveTopic(Guid topicId, Guid memberId, out string errorMessage);
- o RayflowUpdateResult wsUpdateTopic(Guid topicId, RayFlowTopicMemberType allowedTypes, string topicName, out RayFlowTopic updatedTopic, out string errorMessage);
- o RayflowUpdateResult wsUpdateTopicMembers(Guid topicId, Guid[]
 taskMemberIds, Guid[] userMemberIds, out string errorMessage);
- RayflowUpdateResult wsCreateTopic(RayFlowTopicMemberType allowedType, RayFlowTopicType type, string name, out RayFlowTopic topic, out string errorMessage);
- RayflowUpdateResult wsRemoveTopic(Guid topicId, out string errorMessage)

Task locking

- o RayflowUpdateResult wsLockTaskRefresh(Guid taskId, out RayflowTaskLock taskLock, out string message);
- o bool wsIsTaskLocked(Guid taskId, out RayflowTaskLock taskLock);
- o RayflowUpdateResult wsLockTask(Guid taskId, out RayflowTaskLock taskLock, out string message);
- o RayflowUpdateResult wsLockTaskRelease(Guid taskId, out string message);

Changed methods:

string wsGetUserPermissions(Guid projectId, out Guid[] viewablePhases, out Guid[] editablePhases, out Guid[] downloadablePhases);

Removed methods

None

Definitions

New classes:

- RayFlowParameterGroup
- RayFlowTaskType
- RayflowTaskLock
- RayFlowTopic
- RayFlowTopicHistoryEntry
- RayFlowTopicMember

- RayFlowTopicAction
- RayFlowTopicType

Changed classes:

• New properties

- RayFlowPackage
 - o RayFlowTaskType TaskType
 - o List<RayFlowTopic> Topics
- RayFlowPackageFile
 - o FileName
- RayFlowParameter
 - o Guid ParameterGroupId
- RayFlowAction
 - o Guid TaskId
- RayFlowWorkFlow
 - o List<RayFlowParameterGroup> ParameterGroups
 - o List<RayFlowTaskTypes> TaskTypes

• Removed properties

- RayFlowTask
 - o bool IsEditor
 - o bool IsViewer

Removed classes:

None

Enums

New enums

• RayFlowTopicMemberType

Changed enums

- RayflowParameterType
 - o Added option: Date
 - o Added option: DateTime

Removed enum

None

Resolved Issues

Following issues have been resolved in RayFlow 4.0:

RF-240	When SQL authentication is being used, crystal reports provides a login section each time you want to run such a report.
RF-940	Wrong spelling in MSI Installer
RF-1451	Database connection string is not updated
RF-1503	Custom fields not displayed in tracking
RF-1587	Phase and MyTasks view - Status column name is missing
RF-1818	CSV Import: Not possible to change column position or to add comment column while no import file is uploaded
RF-1884	NewTask > Import - JavaScript alert on choosing comment column
RF-1917	Change validation tooltip for Email fields
RF-1995	Job persistence not working for FileUploadAction with larger files
RF-2017	NewTask - Tab control is not correctly loaded sometimes (Only Firefox)
RF-2034	Menu entries must be visible in order to access to the desidered page
RF-2117	Rayflow 2.0 out of memory Error
RF-2183	CSV import action does not utilize the default values of a given datafield.
RF-2246	No validation for fields in configuration-Basic configuration> Message settings
RF-2264	Add function call logging and debug output
RF-2267	Add function call logging and debug output
RF-2373	Copy standard project execution (on all features) logs tons of Errors
RF-2389	No empty option for Drop down list
RF-2448	Phase View: Files tab - Deploy with RayManageSoft-Popup is cut off
RF-2458	German Email Templates: Placeholder content in English
RF-2466	Phase view: Grid table page has not been followed the selected task on changed column sorting
RF-2471	Ouick reports: Print/Save button click result in endless loading

RF-2474	Item separator " " showed small
RF-2477	Configuration Datafields - New created datafield is selected after creation but the selected page is wrong
RF-2488	Task Label in Tracking should be configurable
RF-2490	Workflow configuration: New events with already existing names can be created
RF-2498	SLA Editor: Extend validation on Alert property to positive decimals
RF-2530	Event and Condition dropdown list refers to the term "Package" instead of "Task"
RF-2531	Static Pages Grid: Last column is draggable
RF-2535	Global datafields not positioned right in grid
RF-2538	You can't call data field configuration anymore if you type to big number into order field
RF-2541	Text of default email templates refers to the term "package" instead of "task"
RF-2548	Workflow: It is possible to create two actions with same order number
RF-2557	Upgrade to task factory, view permission for create phase required
RF-2594	Clearing selected project logo image doesn't work
RF-2605	Datafields Configuration Tab: Edit Group in Group Configuration impossible
RF-2606	PropertiesService sometimes not showing all properties after project copy/import
RF-2607	Status Configuration: No validation on creating status with already existing name
RF-2610	PermissionService.GetAccessibleRoles fails on user without any group assignments
RF-2613	Basic project template workflow configuration
RF-2614	Extended project template workflow configuration
RF-2616	Batch processing, disabled users are shown
RF-2619	Email Templates - Create button is available also when all 5 (per languages) events have been created
RF-2621	Client: Task Order - Default value of checkboxes are not set
RF-2624	Email Templates - Users in Package reassigned email template are not enclosed between single quotes
RF-2625	My Profile, My Tasks Liste im Dashboard inkonsistent

13

RF-2626	Phase view - No possibility to upload two files sequentially
RF-2627	Phase view - Cancel button under the files tab doesn't work after uploading a file
RF-2633	Phase view - Wrong error message on accepting a task by user with only view rights
RF-2634	Phase view - Appointments marked as not visible are listed before the appointments marked as visible
RF-2638	CSV import doesn't support checkbox datafields
RF-2640	Phase view, saving datafields/changing status performance
RF-2647	Renaming users can lead to uncought exception on existing appointment
RF-2648	Batchprozessing works not correctly
RF-2650	Quick Reports - Remove create phase from "Tasks by Phase" chart
RF-2661	MyProfile: Language Settings - Current Timezone has a numeric default value instead of the current timezone
RF-2667	Changed values for users wont be updated in MyProfile
RF-2705	Bad performance on History tab
RF-2719	Custom filter for tracking
RF-2720	Profile section: Appointments list - appointments are not ordered correctly
RF-2736	Empty/New Project - Unable to create a status manually
RF-2738	Full length of Phase tiles are not displayed (-4 chars)
RF-2743	MSI-Function for filling datafields does not work(Client)
RF-2745	RayFlow is not working correctly if multiple worker processes per application pool are enabled
RF-2748	My Appointments (in project context) - "Download all appointments" file keeps instance-wide data
RF-2752	In tracking are only tasks in workflow visible
RF-2753	First run of rayflow client takes very long > 5 minutes
RF-2754	Images in Crystal reports not visible
RF-2755	My Appointments (in project context) - "Send all appointments" sends instance-wide appointments
RF-2760	Batch Processing - Successful job on big file upload shows Error message and log
RF-2761	Batch Processing - Failed job on giant file upload shows no Error message or log

RF-2780	Datafields with visible property are always visible in all phases
RF-2782	Add RayFlow version and database version to logfile on startup
RF-2784	Unfavorable space relationship in the task list
RF-2791	QuickReport labels overlapping and not readable
RF-2795	Error on using batch processing with mandatory data fields
RF-2796	Task history tab - Uploaded files not journalized (Web only)
RF-2799	Package Path basic configuration - Non-textbox datafields are offered as options
RF-2806	Add custom fields to My Tasks and Batch Processing
RF-2809	Add task entry date to task grids
RF-2813	Add active user column to Batch Processing
RF-2814	Use custom fields in custom filters
RF-2824	Workflow - Create Action shows default value 0xxx
RF-2825	Unassigned user causes error
RF-2826	Cannot cleanup project
RF-2830	Datafield configuration - Change from single to multiline textbox not recognized
RF-2835	Phase view - Commands column can be filtered in the filter builder
RF-2849	My Appointments - Error when trying to edit multiple appointments at once
RF-2851	Phase configuration, state of editable checkbox for global datafields
RF-2852	Phase configuration, editable checkbox is not cleared when selecting editable group
RF-2865	Out of memory on task creation with file
RF-2867	Error while uploading large files
RF-2870	The RFC waits when a tool is run in standalone mode
RF-2880	Upgrading to task factory does not add default task type
RF-2883	AD user import, user is created with wrong domain when using LDAP filter
RF-2883 RF-2884	AD user import, user is created with wrong domain when using LDAP filter AD user import can only import from the default Users group

RF-2904	XAML parsing error on displaying TaskControl
RF-2929	File upload using IIS virtual directories not working
RF-2931	Files with & in file name can't be downloaded
RF-2949	Link to support panel incorrect
RF-2966	Migration - Required datafield are migrated as optional datafields
RF-2985	Status and workflow configuration fails for a new vanilla project

Known Issues

This lists the known issues added by this release of RayFlow Web:

- RF-3023 Phase Configuration: Datafields of disabled datafield groups are not displayed
- **RF-3026** ActivationTool Warning shown after successful activation
- **RF-3077** Project import fails if the template contains email templates
- **RF-3081** Batch Processing: Notifications on datafield change are send multiple times
- RF-3118 Not all non-alphanumeric characters are accepted for user passwords

RF-3109, **RF-3110**, **RF-3111**, **RF-3112**, **RF-3113** Translations for user content (phases, SLA, category, status, datafields) are not used everywhere in the UI

System Requirements

Hardware Requirements

Minimal

- Minimum disk space required: 120 GB
- Minimum RAM required: 1GB
- Pentium 4, 2.4 GHz Processor
- Network 100Mbit

Recommended

- CPU Intel Core i5 or i7
- 8GB RAM
- Disc Space: 500 GB RAID 10 (4x250GB)
- Network 100Mbit

Prerequisite Software

The following are the minimum software requirements for the installation and running of RayFlow 4.0.

- Windows Server 2008 SP2 or higher
- Microsoft SQL Server 2008 or higher
- IIS 7 or higher
- .NET 3.5 for SQL Server
- .NET 4.5

Ø

Note:

Minimum server requirement for .NET Framework 4.5 is Windows Server 2008 SP2. Further information on system requirements for .NET Framework 4.5, can be found under the following link: https://msdn.microsoft.com/en-us/library/8z6watww%28v=vs.110%29.aspx

• Microsoft Report Viewer Runtime (Required to view SSRS Reports)

Please refer to the following links for system requirements related to different versions of Microsoft Report Viewer Runtime

Microsoft Report Viewer 2012 Runtime

http://www.microsoft.com/en-us/download/details.aspx?id=35747

Microsoft Report Viewer Redistributable 2008

http://www.microsoft.com/en-us/download/details.aspx?id=577

Crystal Report Runtime 2010 13.0.14 (Only required if Crystal Reports are used for reporting)

Supported internet browsers:

- Microsoft Internet Explorer[™] version 9.0 and newer
- FireFox version 3 and newer
- Chrome
- Microsoft Edge
- It is recommended to use a screen resolution of at least 1024x768 pixels.
- Although other browsers might work they are not officially recommended.

RayFlow Upgrade

Detailed information pertaining to upgrade of RayFlow Server and client from their previous version to this release is provided in the RayFlow Installation Guide. For assistance in this regard, please contact our Raynet Support Team.

Changes to the RayFlow Licensing Model

If you are migrating from RayFlow 2.x or earlier, your existing license data will not be recognized by version 4.0. In order to use RayFlow 2.1 you have to reactivate RayFlow using the same order number, and the necessary license information will be automatically downloaded from the server. This operation requires that you have a valid maintenance for the product. Contact our support to get help regarding migration and licensing themes.

Additional Information

Further information regarding RayFlow can be found in several resources which are available.

- The Operations Supplement provides information about third-party software and libraries redistributed with RayFlow.
- The Administration and Configuration Guide provides detailed information about RayFlow.
- The product website https://raynet.de/en/Raynet-Products/RayFlow provides information about the product, news, and support.
- Raynet and its partners offer a range of training courses that can also be customized to meet your requirements. For more information on these courses, speak with your Raynet consultant or contact the Raynet Sales department via sales@raynet.de.

About Raynet

Raynet GmbH is a leading and innovative service and solution provider in information technology and specialized in the architecture, implementation and operation of all tasks within "Application Lifecycle Management". Raynet's Headquarters is in Germany and presently has more locations in Germany, USA, Poland, UK and Belgium.

For over 15 years, Raynet has supported hundreds of customers and partners with its products and solutions for enterprise application management projects worldwide. These include license management, software packaging, software deployment, migrations, client engineering and much more. Additionally, Raynet maintains and cultivates strong partnerships with leading companies in Application Lifecycle Management.

Raynet products and solutions are unique in design and functionality. Their development is highly driven by our customers and partners who play a big role in the development of our products and are a key reason why our products are always cutting edge. Whether you want to introduce a new deployment tool or to start a SAM project, whether you want to plan a packaging factory or do a migration – Raynet is the choice for best-of-breed-practices in services, products, and solutions for Application Lifecycle Management.
